AQA Engineer

I am Victor. I care about **quality and automation**: I design test strategy, build backends for API checks, and ship documentation people actually use. At work that means GraphQL and pytest, Allure and DevTools, and pushing tests left so bugs land in CI instead of production. I also write about QA and tech on [Telegram](#).

Full Name: Серняев Виктор Романович (Victor Sernyaev)

Education: Bachelor's Degree (CT PenzGTU), Bachelor's Degree (PenzGTU)

Contacts: [✉ v@removespread.ru](mailto:v@removespread.ru), [📱 @removespread](https://t.me/removespread), [🌐 @removespread](https://github.com/removespread)

Languages: [🇺🇸](#) English — fluent, [🇷🇺](#) Russian — native, [🇩🇪](#) German — beginner

Yandex [↗](#)

Time Frame: Oct 2025 — present

Role: AQA Engineer

Experience:

- **Alice AI** — Yandex's AI assistant platform: manual testing on neural-assistant flows.
- **Yandex Select Pluses** — loyalty program (Plus points, discounts, gifts): built a **GraphQL API automation framework** from scratch (architecture and automation strategy); backend autotests in **Python / pytest** with **Allure**; manual frontend testing, test artefacts and wiki documentation; integrated **AI-assisted** authoring for backend tests (~15 minutes per test) and presented the approach to senior management; **150+** autotests from zero plus full project documentation.

Stack: Python, Pytest, Allure, DevTools, Linux, TMS, Wiki.

Open Solutions [↗](#)

Time Frame: Jan 2025 — Oct 2025

Role: QA Engineer

Experience: Functional, integration, regression, and UI/UX testing for a web product; traffic analysis in DevTools; bugs and test docs in **Redmine**; Agile/Scrum planning and estimation; introduced test-case review and documentation standards to speed up onboarding; onboarding materials that cut new-hire ramp-up to about **2-3 weeks**; **"3 Amigos"** sessions (analyst + FE/BE leads) for alignment.

Stack: Linux, PostgreSQL, Proxmox, Jenkins, Postman, Grafana, Playwright, TypeScript, Python, Git.

Citydrive [↗](#)

Time Frame: Oct 2024 — Dec 2024

Role: Golang Developer

Experience: [proil.tech](#) — B2B2C/B2B fueling platform (Citydrive subsidiary): CRUD and aggregation for fueling events, backend tests in **Go**, **Sentry** logging across the service, bug analysis and fixes.

Stack: Go, Redis, Docker, Linux, PostgreSQL, Sentry.
